Lessons learned from carbon removal evaluation

MINERALIZATION WORKSHOP @ ARPA-E
JUL 15 2021

What we do

Ensuring the scientific integrity and transparency of climate solutions through open data and tools

Why evaluate carbon removal?

LOTS OF ACTIVITY

- Public and private climate commitments relying on CDR purchases
- Several recent and large corporate CDR solicitations

LACK OF STANDARDS

- Enormous variability in project quality
- Most evaluation happens behind closed doors

NEED FOR QUALITY

- Analysis helps identify high quality outcomes
- Knowledge sharing helps move the field forward faster
